

Protective film

Installation: Before placing the film on the glass, remove static electricity and dirt with a microfiber cloth.

Then peel off the special adhesive film by no more than 2 lines (recommended), fold it over and leave the edge exposed and stick it firmly to the glass.

Simply allow the film to adhere over the glass by pulling away the exposed edge.

Firmly secure the foil by pressing along the surface.

Remove the outer protective film.

More instructions inside.

Note: When using the film, we recommend that the glass is already installed in the frame of your glasses.

Dispose of the product in an environmentally friendly manner at the end of its useful life.

Country of Origin: Made in GB
